

OCT 04 2001

BROOK MARLOWE: My name is Brook Marlowe,

552281

6 B-r-o-o-k M-a-r-l-o-w-e, and I'm here, too, just
7 representing myself.

8 I think Yucca Mountain is a bad idea, not
9 only for storing nuclear waste in one site, but also the
10 transportation across how many states, and with the
11 problems we have with the railroads and the crashes that
12 they have, we're just spreading the waste.

13 I don't understand why we can't do what the
14 French are doing, which is burning up their waste so we
15 don't have it, have the problems that we have here, here
16 in the United States. I also think if you're using
17 nuclear waste, then it's your problem to solve how you're
18 going to get rid of it.

19 I think one of the problems here in Nevada is
20 only seven percent of the state is owned by individual
21 people, the rest of it is government, and so it's kind of
22 like there aren't enough people, let's just throw it out
23 there, they don't care, they're western hicks. But I
24 just don't feel Yucca Mountain is right. I think
25 we're -- it's on fault lines. Besides the water, I just

97

1 think it's not a good idea.

2 Thank you.
